This project has received funding from the Research Fund for Coal and Steel under grant agreement No 101033989.

PUBLISHABLE SUMMARY

The aim of this deliverable is to draft an exploitation plan, which will collect the individual strategies for exploiting the results and knowhow gained. To ensure this, this deliverable can be understood as a strategy paper how the beneficiaries will exploit the results during the project and to ensure the exploitation once the project has finished.

In order to continuously update and keep the focus on future exploitation, revisions will be made during the project.

In the second part of the deliverable, we present the main dissemination channels and the tools which will be used to increase the visibility of the project.

This dissemination strategy is intended to provide a clear and comprehensive approach of the dissemination activities to be implemented during the project as well as to provide the project partners with an overview on how the consortium is expected to contribute to the dissemination activities.
